PROJECTS

E-Commerce Website – A platform to easy sell and purchase items

This is a website designed using html, css and javascript which includes features like easy payment, add to cart and various others which gives you an amazing shopping experience

College Registration Page– Registration form page for student details

This is a form designed for college website to retrieve information through html forms and styled using css

Bootstrap Landing Page – A landing page to explore Bootstrap

This page was designed exclusively using Bootstrap as an assignment which covers use of elementary features provided by the html, css and js framework

Portfolio – A representation of My work, skills and Projects

The portfolio website I designed as a front end developer using html, css and js. This is an elegant website yet simple page which represents my skills, experiences and projects.

WordPress Website – Portfolio designed using Elementor

Using various WordPress tools, themes, templates and plugins such as Elementor, Elementor Addons.

Hand Sign Detection – Using WebCam to detect Hand Signs

This project focuses on Transfer Learning and Object Detection in real time. The model uses a webcam to detect any object in real time.
